Virtual Internship Program

An initiative of **SmartBridge** in collaboration with **APSCHE** to Build a Job-Ready Talent Pool via Project-Based Learning

Register Now

Supported by

Google for Developers   mongoDB   IBM   ZOHO

Program Overview

This initiative, in collaboration with APSCHE aims to build a job-ready talent pool in the various demanding technologies.

This is a 4 months virtual internship, an experiential learning program designed to make the students employable. This program helps students build their profile aligned to a job role through hands-on project-based learning under the guidance of industry mentors. It helps students acquire technical and professional competencies while working on real-world challenges and creating innovative solutions. The program encourages students to think critically and creatively, and it is designed to provide industry-level training at the college level.

CRM Application That Helps To Book A Visa Slot - Developer

A visa slot management project is a system that is used to track and manage the availability of visa slots, which are appointments that are required for certain visa applications. It might be used by a government agency or a visa processing center to schedule and manage appointments with applicants.

Custom Tabs

Help for this Page 📄

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Virtual Internship Program
Salesforce Admin/Developer

How to Complete Long-Term Internship Program?

Step-1: Create the Trailhead Account.
You are requested to create the Trailhead account as an initial step to complete your self-learning courses and Super badges.
Link - https://trailhead.salesforce.com/en

Step-2: Attend the live sessions and complete the self-paced learning courses.
You need to attend the live sessions to gain hands-on experience on the Salesforce cloud which will help you in completing modules along with the super badges & supersets on the Trailhead platform. Refer to the self-paced learning Trailmix under the courses tab.

Step-3: Complete the Super Badges, Supersets & Guided Project
Access the super badges and supersets listed under the guided project tab by clicking the go-to workspace button. This will open the guided project template with step-by-step instructions to complete the project activities. The guided project template consists of project milestones (Orange), project activities (Red), and reference links (Blue), which will help you to complete the super badges in a sequential manner.

Step-4: Access the Project Workspace & Update the Work Status
Access the project workspace, where you can find all the activities and milestones given under guided projects in the form of Tiles. Move the status of each card to review under Tasks & Progress (Kanban board) as you complete the activity so that the mentor will be able to track your progress.

Step-5: Submit Trailhead profile URL for verification to get Completion Certificate
The associated mentor will review the modules and super badges completed by you through the profile URL submitted and if everything is done perfectly, you are all set to receive your internship completion certificate.

Note:
Update the project completion status regularly through the Kanban board
Ensure that you submit your trailhead profile URL for verification
Internship completion certificate will be awarded only if you complete all required modules, super badges, supersets & Guided Project.
